

# Enterprise Skills Initiative content portal by Learn on Demand Systems

## Using the ESI content portal hosted by Learn on Demand Systems

The Enterprise Skills Initiative (ESI) helps sharpen your technical skills and knowledge of Microsoft platforms and solutions.

Some ESI classes provide access to labs and other content (such as videos, slide decks, surveys, and more) through a portal hosted by Learn on Demand Systems (LODS) on behalf of Microsoft. This document contains information about how to use that portal.

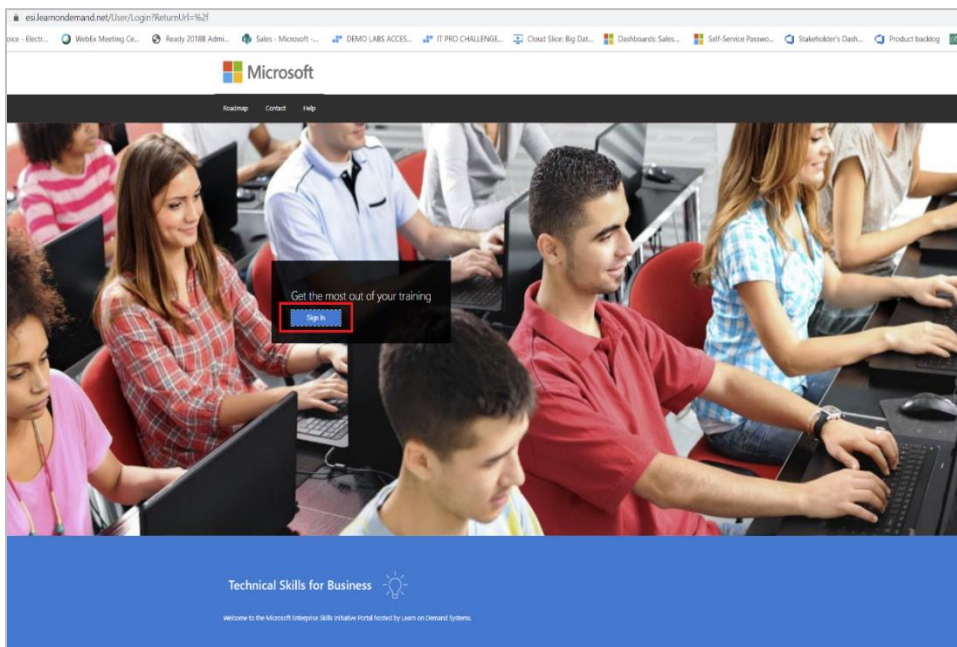

If you have any technical issues with the Enterprise Skills Initiative Portal hosted by LODS, please go to [ESI support](#).

# Accessing your class content

On the day your class is delivered, your instructor will provide you with class-specific access information, including the sign-in URL and the event training key for your class.

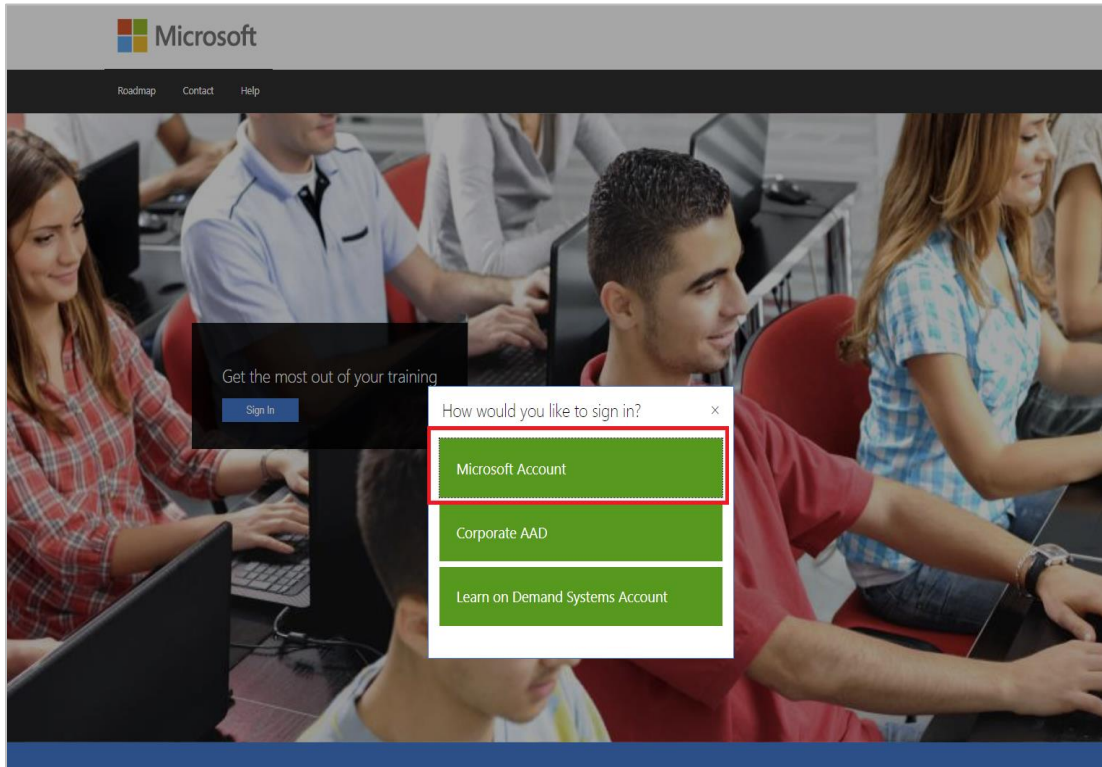

To get started, using an HTML5-compliant browser, go to the sign-in page for the Enterprise Skills Initiative Portal hosted by LODS: <https://esi.learnondemand.net>.

1. To get started, select **Sign In**.

2. Select one of the sign-in options:

- If you have a Microsoft Account (MSA) you can use to access the training, select **Microsoft Account**.
- If you have a Microsoft Azure Active Directory (AAD) account, select **Corporate AAD**.
- If you don't have an MSA or Microsoft AAD account, select **Learn on Demand Systems Account** and create a local account.

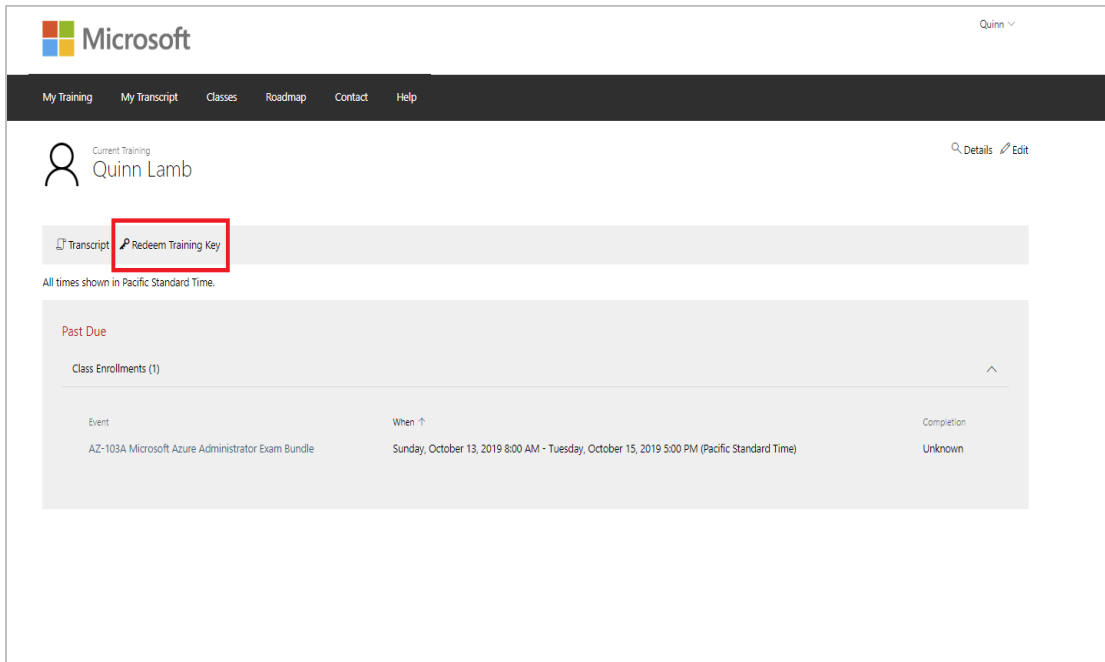

3. To create a local Learn on Demand Systems Account, fill in the information on the registration page and then select **Save**.

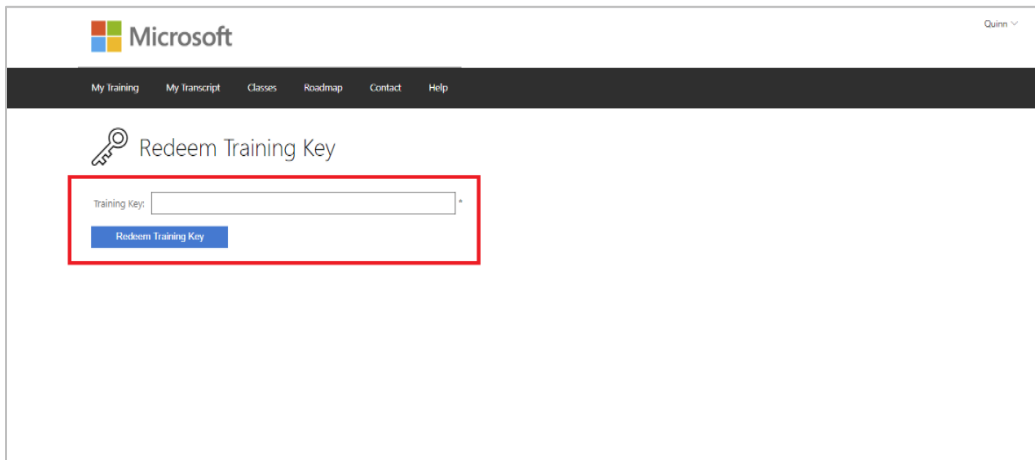

The screenshot shows the Microsoft registration page. At the top is the Microsoft logo and a navigation bar with links for Roadmap, Contact, and Help. Below the navigation bar is a profile icon and the word "Register". The registration form includes fields for First Name, Last Name, Primary Email, Username, Password, and Confirm Password, each followed by an asterisk indicating it is required. There is a "Show Characters" link next to the Password field and a "Password Policy" link next to the Confirm Password field. A Time Zone dropdown menu is set to "(UTC-06:00) Central Time (US & Canada)". Below the form is a checkbox labeled "Enable Notifications" which is checked. At the bottom is a blue "Save" button.

4. After you sign in, the Current Training page opens.

5. To redeem the event training key, select **Redeem Training Key**.

6. Enter the event training key that your instructor provided, and select **Redeem Training Key**.

This opens the class page with the list of labs and any additional content for the course (if available), including videos, slide decks, surveys, and other materials.

7. Before you can launch the labs, you'll be prompted to read and accept the Microsoft EULA. Select **View Agreement**.

AZ-103A Developing Solutions for Microsoft Azure - Labs for the courses aligned with this exam.

→ 1

Azure Virtual Machines (Expected Duration 1 hour, 0 minutes)  
AZ-103700A: Microsoft Azure Administrator, Module 02  
Required: Yes  
Status: Not Started

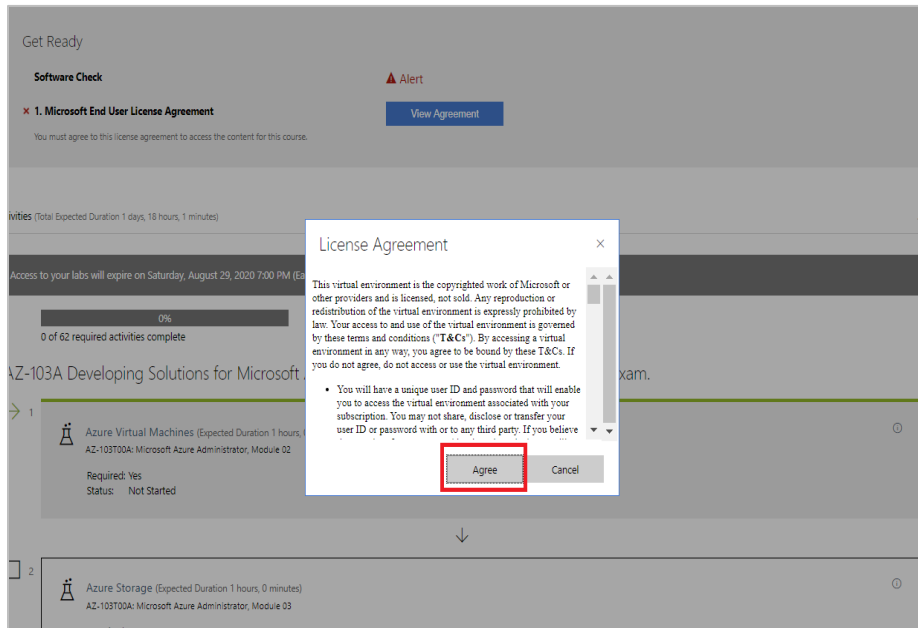

↓

□ 2

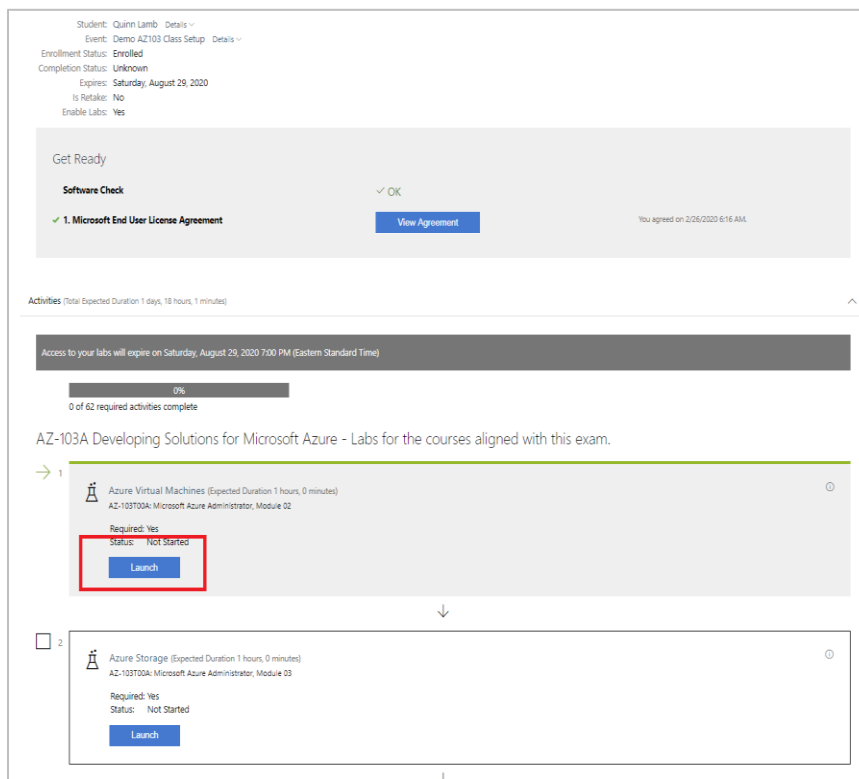

Azure Storage (Expected Duration 1 hour, 0 minutes)  
AZ-103700A: Microsoft Azure Administrator, Module 03  
Required: Yes  
Status: Not Started

↓

8. When you've reviewed the Microsoft EULA, to agree to its terms, select **Agree**.

9. After you agree to the EULA, **Launch** buttons appear next to the labs. To access the lab interface for a specific lab, select **Launch**.

When you return for subsequent training days for the class, sign in with the same method and account as you did at the beginning of the class. On the Current Training page, in the list under **Classes**, find your class. To resume class activities, select the link for your class.

You can also see classes you've previously taken. If the post-event access window is still open for one of those older classes, to access its labs, select it from the class list.
